

The Elections tool allows to create a space dedicated to the presentation of the candidates in municipal elections for the positions of Mayor, Councillor and Councillor of District (for municipalities divided into Districts) .

Candidates have the opportunity to present themselves through a card containing

- charge which is a candidate
- election symbol
- e-mail, website and Facebook page
- informed debate connected
- reasons for the nomination
- curriculum vitae
- attachments

which is visible in their personal profile. Data can then be modified and the changes are notified to potential subscribers .

Candidates are also included in lists organized by charge and searchable by list or by name.

The compilation of the card is subject to approval in order to avoid arbitrary compilations from people
not
actually present
in
the list.
